

## YOUR RING SIZE GUIDE

There are many different international ring size formulas being used to measure ring size. New Zealand and Australia follow the UK ring size formula, which comprises both letters, and numbers, while Canada and US share the same ring size formula which only consist of just numbers and is the most widely used. The Gemans round mm ring size width to get the closest size.

The most common ring size for ladies is size 7 and size 10 for gents.

Please refer to our International Ring Size Chart below for your reference.

At DG & Co. we use the American ring size formula to accurately measure your ring size using the number scale. We also offer our customers free resizing for up to 30 days.

To ensure the ring ordered from DG & Co. accurately fits your finger size, you will need to ascertain your ring size.

### Measuring your Ring Size

There are two methods of obtaining your ring size. You may choose between the two which ever you feel most comfortable. Please feel free to contact us if you require any assistance.

**Important Tip:** Make sure to measure your ring finger at the end of the day; this is when your finger is the thickest due to fluid retention. Measuring your finger in the morning or when it is cold may result in an inaccurate measurement and a smaller ring size.

**Method 1:** Measure the inner diameter of your existing ring from your current jewellery collection by simply placing your ring on a circle within the chart below. The inside edge of the ring needs to be matched to the circle closest to the ring.

If the ring size falls between two circles, then order the larger ring size.

**Method 2:** Wrap a 5mm paper around your finger. Stick the paper together; make sure you can move it up and down the finger as to make sure you can get past the knuckle. Then take the piece of paper off and measure the inner diameter to see which of our sizes is closest to you. Refer to our International ring size chart below to find your ring size.

Diameter		Circumference		Sizes					
(inch)	(mm)	(inch)	(mm)	USA & Canada	UK & Ireland & Australian	Japan	Switzerland	France	Germany
0.586	14.884	1.850	47	4	H	7	6.5	46.5	15

## Our Complimentary Plastic Ring Sizer.

At DG & Co. we offer a Complimentary Plastic Ring Sizer for your convenience.

Please feel free to visit our **Contact Us** page and fill out our Information Request form or you may prefer to email us at [info@diamondgold.com.au](mailto:info@diamondgold.com.au)

or call us on 1300 647 779 to request our Complimentary Plastic Ring Sizer.

WORLD FAMOUS  
**MULTISIZER**  
RING SIZING GAUGE

The Multisizer works like a belt. Simply push the end through the buckle to form a ring shape.

Slip the Multisizer onto your finger. Adjust to give a comfortable fit, checking that it just slips back over the knuckle.

When best fit is achieved, read off size indicated by the arrow. (size D shown)

### **Measure your Ring Size at your Local Jeweller.**

Visiting your local Jeweller is another way you can ascertain your ring size if you are uncomfortable with the methods suggested. Most jewellers offer complimentary ring size measurement.
